

vigilius mountain resort

5 star design hotel in South Tyrol

Complete fusion with nature, perfect location, contemplation aimed at recovering energies: these are the premises of the architectural design of **vigilius mountain resort**, upon San Vigilio Mountain, between Val Venosta, **Merano** and Val d'Ultimo. Cars are not allowed here: in fact **vigilius** can be reached with a brief **cable car** journey. Resembling a fallen tree, the **vigilius** hotel nestles quietly into the surrounding landscape: stone and glass create an original and innovative atmosphere, both in aesthetic and functional terms. The architectural purity becomes therefore a constant that can be found especially in the **vigilius mountain spa**, with pool and panoramic sauna, both overlooking the western Dolomites and fed with spring water. But **vigilius** is not only a relax heaven: through the **vigilius mountain stories** project it asserts itself as an important cultural landmark. As a matter of fact every guest is asked to write and leave here a short-story which will be saved for at least 150 years in an online database.
